BABY CARRIERS

COLLECTION 2019
BABY CARRIERS
A CLOSE BOND
Love is the art of intimacy, a feeling that requires trust and a sense of security. To love and know someone closely, to go through life together heart to heart, and to feel how this bond creates trust – this gives us energy and bolsters our self-confidence. Babies in particular need to be close to their parents. They need warmth and security, a sense of familiarity in a world that is still new to them. It’s no coincidence that intimacy and security go hand in hand. CYBEX Baby Carriers let you integrate physical contact with your baby into an active everyday life – elegant, stylish and full of confidence.
CARRYING COMPETENCE

CARRY YOUR BABY ...

Babies love to be carried. A baby carrier offers the baby close physical contact with mom or dad and satisfies their basic need for security and closeness while promoting self-assuredness and independence. Correct carrying in a baby carrier promotes an optimal posture and supports the healthy physical development of the baby.

... AND PROMOTE HEALTHY DEVELOPMENT OF THE BACK AND HIP JOINTS!

After nine months in the mom’s womb, babies are born with a lightly curved spine. After birth, the spine straightens: a slow and cautious process, which takes over a year. Right after birth, babies take up the spread-squat position, which promotes the continued healthy development of the hip joints. Carrying your baby in a carrier promotes the natural maturation of the hip joints.

CARRYING POSITIONS FOR EVERY AGE AND PREFERENCE

Our Expertise

Baby carrying is a topic CYBEX takes very seriously. In close collaboration with midwives, osteopaths, and baby carrying schools, we’re continuously expanding our expertise in all things related to baby carrying.

We have made it our goal to educate trainers around the world to represent both our baby carriers and the concept of carrying to the industry. These carrying advisors are now considered professional sources of knowledge for our product development, and help us learn more about the wishes and needs of our most valued customers—parents.

International Hip Dysplasia Institute

The IHDI recommends babywearing for healthy hip development as long as the correct carrying position (spread-squat position) is guaranteed. As all CYBEX baby carriers allow for healthy carrying positions, they were certified as ‘hip healthy’ by the IHDI.

Further Benefits of Babywearing

Senses/Early Development

Carrying stimulates all physiological senses, such as perception of the body through balance, gravity, physical boundaries, internal organs, positions of the joints and movement. Also the very important perception of the environment through the senses, such as hearing, tasting, smelling, touching and seeing, are being developed.

Bonding/Psychology

Last but not least – carrying strengthens the important parent-child bonding and continuously satisfies the emotional needs of the baby through closeness, warmth and a feeling of security. This leads to babies who cry less and sleep better. At the same time, the baby carrier offers parents more flexibility, mobility and free hands for everyday tasks while being close to their precious baby.
MAIRA.TIE

From newborn to toddler (approx. 3.5 – 15 kg)

Safety and comfort for parents and child: Simple and intuitive handling makes the MAIRA.tie baby carrier by CYBEX particularly comfortable for adults of all shapes and sizes. Tying is a versatile way to fit the carrier to the wearer, making it perfect for sharing between different caregivers. The user-friendly adjustable back panel supports your child’s natural spread-squat position (up to approx. 2 years) and so promotes healthy development of their hip joints – regardless of height and weight. The integrated, multi-functional head and neck support provides stability to your baby’s head and neck. Meanwhile, the diagonally elastic fabric of the MAIRA.tie supports your baby’s natural posture.

MAIRA.CLICK

From newborn to toddler (approx. 3.5 – 15 kg)

The MAIRA.click is an especially flexible and comfortable baby carrier in the CYBEX Gold Line. Thanks to its diagonally elastic cotton fabric, the carrier adapts perfectly to your baby without any pressure on baby’s back to ensure the ideal carrying position. The easy-to-use buckle system ensures straightforward adjustment. The ergonomic seat can be adjusted in length and width to the size of your baby or toddler (birth up to approx. 2 years), carrying them in a way that is both healthy and comfortable. The integrated, multi-functional head and neck support provides stability to your baby’s head and neck. The MAIRA.click allows your baby to take a natural spread-squat position, supporting healthy development of their hip joints.

BEYLA.TWIST

From newborn to toddler (approx. 3.5 – 15 kg)

The BEYLA.twist full-buckle baby carrier from the CYBEX Gold line is highly versatile. Its four ergonomic and comfortable carrying positions promote your baby’s optimal posture, regardless of carrying direction. Thanks to its practical buckle system, the carrier can be pre-adjusted as needed and is ready to wear in just a few seconds. The ergonomic seating ring can be easily adjusted to the size of your baby to support their natural spread-squat position, which is important for healthy development of the hip joints. Together with its multi-functional head and neck support, the BEYLA.twist baby carrier supports your baby’s natural posture from birth to approx. 2 years.
