INDIVIDUALISED MOBILITY

The demands CYBEX places on the development and manufacture of its strollers are based on a simple aim: to provide modern parents with the best equipment available. The new PRIAM is our calling card. Inspired by the clear, timeless design of Ray and Charles Eames, CYBEX has developed a stroller that is not only especially practical and robust, but also a true designer piece.

With its products, CYBEX wants to enable parents to express their style-savvy and trendsetting fashion sense as a family. That’s why CYBEX designed the new PRIAM, with its sophisticated look, pure aesthetic lines and high-quality materials.

And since true design is distinguished by its practicality, the new PRIAM is especially handy. Its new 4-in-1 travel system can be individually customised, using just one frame. With the comfortable LITE Cot or LUX Carry Cot, the system transforms into a cosy bed on wheels. Paired with the award-winning CYBEX infant car seats, it becomes an agile mobile support. Later, the PRIAM serves small children as a safe, comfortable travel companion whose sitting direction can be individually adjusted.

With the e-PRIAM, CYBEX uniquely combines the luxurious design and functionality of the new PRIAM with the smart technology and comfort of an e-bike.

AVAILABLE EARLY 2019
The intelligent functions of the e-PRIAM make everyday life easier for modern parents and turn hilly cities and uneven terrain into child’s play. The unique uphill and downhill assistance make ascents and descents as effortless as flat terrain. And because not all paths are uniformly smooth, the e-PRIAM smartly adapts to the respective surface. Whether cobblestones, sand, forest paths, snow or gravel, the e-PRIAM is a breeze to manoeuvre.
THE NEW LIGHTNESS

The new MIOS is a milestone in terms of compactness, flexibility and design language – developed as an elegant and practical companion for modern families.

Extra robust with minimal weight, it supports an active and adventurous lifestyle. The MIOS has been designed to easily overcome all the obstacles of the urban jungle, navigating through the challenges of urban centres with ease and agility.

As with the PRIAM, the new, elegant look of the MIOS ensures that parents can express their style-savvy and trendsetting fashion sense. The design of the MIOS makes an especially high-end impression – thanks to pure, aesthetic lines and high-quality materials.

Its lightweight frame makes the MIOS seem as light as a feather. Its retro-modern design language is complemented by fine, breathable mesh to ensure a balanced climate. In addition, the revolutionary 4-in-1 MIOS travel system allows the use of different attachments on a single frame.

With the comfortable LITE Cot or LUX Carry Cot, the MIOS is transformed into a luxurious cocoon on wheels. Paired with the award-winning CYBEX infant car seats, it becomes an agile mobile support.

Later, the MIOS frame serves somewhat older children as a safe, comfortable travel companion whose sitting direction can be individually adjusted.

A familiar voice, cosy warmth and that unique odour – a baby carrier intensifies that important bond between parent and child from birth. »Babywearing« nurtures a deep sense of trust between parent and infant, while stimulating the child’s cognitive development. The correct carrying method places the infant in the healthy spread-squat position, helping the joints to develop. A baby carrier provides you with almost unlimited mobility: while your baby is in a snug and safe place, your hands are free to deal with the challenges of fast, urban life. The YEMA is now available in 2 versions: YEMA TIE for easy individual adjustment and YEMA CLICK for fast click-on & off – fitting your personal needs perfectly.
Babies can be carried facing the chest from birth. The baby carrier encourages the correct posture in the spread-squat position, which can help the hip joints to develop correctly.

Babies that can hold their own head up (from around 3–4 months) can also be carried in the side position. This allows them to rest against mum’s shoulder while taking in their surroundings.

Babies with good head and upper body control (from around 6 months) can be carried in the YEMA on the back, making it easy for parents to bear the baby’s weight.

From newborn to toddler (approx. 3.5 – 15 kg) with three carrying positions: in front, on the side or on the back.

FOOTMUFF CHERUBS
518001410

The CYBEX footmuff by Jeremy Scott offers protection against wind, rain and cold. Made from easy-care fabrics with a cozy lining, this spacious footmuff keeps your baby warm and offers a plastic insert to prevent your footmuff from soiling.

The new CYBEX × Jeremy Scott «Cherubs» collection combines playful imagery, graceful embellishments and a breathtaking light pink to deliver a memorable fashion statement.
The sweeping expanse of the universe, where stars, planets and galaxies move beyond space and time in an everlasting dance with gravity was fashion’s new shooting star Anna K’s inspiration for her SPACE ROCKET collection for CYBEX. The interaction between softness and power, cocooning and exploring is reflected in the new editions of MIOS, PRIAM, YEMA TIE and CLOUD Z - intergalactic space capsules for little urban star hunters. Every walk turns into an individual orbit for metropolitans. The countdown is on. Bon voyage!

ANNA K TRAVEL SYSTEM

The CYBEX PRIAM and MIOS Platinum 3-in-1 travel systems enable three different uses: with matching LUX Carry Cot, with one of the award-winning CYBEX infant car seats, and later as a luxurious stroller with a reversible seat unit.
The Cloud Z is available in the «Anna K» collection with space print and intergalactic appliqués. The infant car seat is a perfect symbiosis of safety and fashionable design.

The YEMA TIE is an intergalactic fashion statement that expertly combines ergonomics and comfort with quality you can count on. The diagonal-elastic wrap-like fabric supports baby’s head and naturally rounded back.

The high-quality fabric is embellished with appliqués as planets, rockets and stars and takes parents and children to the sweeping expanse of the universe.

The stylish footmuff with cozy fleece lining scores extra points with its intergalactic print. It is compatible with the PRIAM and MIOS strollers. The water-repellent material protects against wind, rain and cold.

The cozy blanket is knitted with a beautiful Jacquard technique which supports the theme SPACE. It’s easy to clean machine-washable.
The CYBEX for Scuderia Ferrari collection of car seats, strollers and baby carriers features unmistakable Ferrari accents. The Platinum line offers a contemporary design, using premium materials and finishes such as the leather look in silver grey with racing red colour accents.
The high-quality fabric comes in elegant colours and a made-to-last material.

For the first time, CYBEX is connecting with the world of interior design. With the launch of a furniture line and a colourful accessory line that includes a highchair, everything is redesigned to fit seamlessly into the parents’ lifestyle. Leading this exciting collection is the internationally celebrated product and interior designer, Moooi owner and industry rebel Marcel Wanders. The »Parent’s Collection« is sophisticated yet playful, allowing parents to continue their cultured lives – even with little ones in tow. To go one step further, the new range also lets mums and dads pass on their creativity to the next generation through design-forward furniture that smoothly integrates, creating a dream environment in the home.
